Description:

Chomp the Chimp and the Slow Day is the fifth book in *The Adventures of Chomp the Chimp* children’s picture book series. In this story, Chomp begins his day full of energy, swinging quickly through the trees. As he goes about his usual routine, he encounters animals who move at a much slower pace than he does. Chomp watches, wonders, and reflects as the day unfolds, gradually noticing that not all movement need to be fast and that not everyone is in a hurry.

Guided by developmental psychology, told in gentle rhyme, and paired with soft, expressive illustrations, this fifth installment of *The Adventures of Chomp the Chimp* unfolds at an unhurried pace that emphasizes curiosity, mindful observation and reflection, and respect for individual differences. The book is intended for children ages 3-7 and geared towards family shared reading, bedtime reading, as well as classroom use.
